

Halloran Survey, 2022, KRA sections

Overall results:

94 percent of residents were Satisfied or Very Satisfied with the functions of the KRA.

Written comments about KRA on 2022 Halloran Survey

- I am not in a leadership position on KRA, but from the outside, it looks like KRA leadership is also afraid to bring up issues or residents' concerns if they see a strong difference with the Administration. What I see is that the KRA doesn't want to strongly share controversial ideas because they're afraid of losing the Administration's ear.
- Not enough time allotted for questions in forums or KRA meetings. At this point in time, KRA is focused on representing administration, not the residents.
- Hence, I suspect that it's increasingly difficult to find willing board members for our KRA board.
- At the same time, I look for management to work with the KRA and the variety of Kendal groups to help us all sustain a viable and ongoing reality of community.
- Resident engagement with KRA is insufficient - needs improvement. The KRA is not representing the community well.
- KRA does not represent me and many others.
- KRA truly representing residents
